

Thank you for choosing the **Neuro Poseidon MT4 Indicator**.

Neuro Poseidon is an advanced trading indicator designed to provide traders with clear, confirmed BUY and SELL signals while automatically generating adaptive Take Profit (TP) and Stop Loss (SL) levels for every trade opportunity.

The indicator has been developed to simplify decision-making and help traders identify high-probability market opportunities across multiple asset classes and timeframes.

Whether you are a beginner or an experienced trader, Neuro Poseidon provides a clean and easy-to-understand trading environment.

Key Features

Proven Performance Across Markets

Neuro Poseidon is designed to work on:

- Forex pairs
- Gold and Silver
- Indices
- Commodities
- Cryptocurrencies
- Stocks and CFDs

The indicator can be used on any timeframe, from scalping charts to long-term swing trading setups.

Confirmed BUY & SELL Signals

Only confirmed trading signals are displayed on the chart.

This helps reduce market noise and allows traders to focus on actionable opportunities.

Adaptive TP & SL Levels

For every trading signal, Neuro Poseidon automatically generates:

- Recommended Take Profit level(s)
- Recommended Stop Loss level

These levels adapt to current market conditions.

Easy to Use

No complicated settings or analysis required.

The visual interface is designed for traders of all experience levels.

100% Non-Repainting

Once a signal appears and is confirmed, it will never move, disappear, or change position.

This ensures full transparency and reliable historical chart analysis.

Built-In Alerts

The indicator can notify traders when new opportunities appear through:

- MT4 pop-up alerts
- Sound alerts
- Push notifications (if configured)
- Email notifications (if configured)

Installation Guide

Open MT4 Data Folder

1. Launch MetaTrader 4.
2. Click:

File → Open Data Folder

A Windows Explorer window will open.

Step 3: Install Indicator Files

Navigate to:

MQL4 → Indicators

Copy Neuro Poseidon indicator file into this folder.

Example:

MQL4

└─ Indicators

└─ Neuro Poseidon.ex4

Install Template File

Go back to the MT4 Data Folder.

Open:

Templates

Copy the supplied Neuro Poseidon template file into this folder.

Restart MT4

Close and reopen MetaTrader 4.

Loading the Template

After installation:

1. Open any chart.
2. Right-click on the chart.
3. Select:

Templates → Neuro Poseidon

The chart will automatically load:

- Neuro Poseidon indicator

- Recommended settings
- Visual layout
- Signal display

The software is now ready for use.

Indicator Overview

Once loaded, Neuro Poseidon displays:

BUY Signal

A BUY signal indicates a potential upward market movement.

When a BUY signal appears:

1. Consider entering a BUY position.
2. Use the generated Stop Loss level.
3. Use the generated Take Profit level(s).

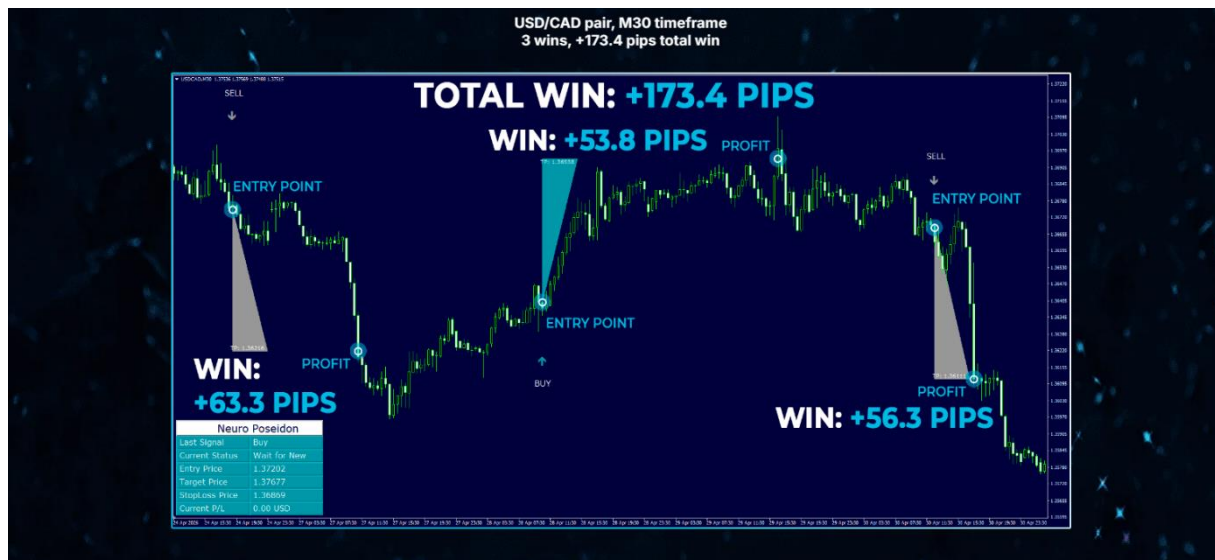

SELL Signal

A SELL signal indicates a potential downward market movement.

When a SELL signal appears:

1. Consider entering a SELL position.
2. Use the generated Stop Loss level.
3. Use the generated Take Profit level(s).

Understanding Trading Signals

BUY Signal Rules

A BUY signal appears when Neuro Poseidon confirms bullish market conditions.

Typical workflow:

1. Wait for BUY signal.
2. Open a BUY trade.
3. Set Stop Loss at the suggested SL level.
4. Set Take Profit at the suggested TP level.
5. Manage trade according to your trading plan.

SELL Signal Rules

A SELL signal appears when Neuro Poseidon confirms bearish market conditions.

Typical workflow:

1. Wait for SELL signal.
2. Open a SELL trade.
3. Set Stop Loss at the suggested SL level.
4. Set Take Profit at the suggested TP level.
5. Manage trade according to your trading plan.

Take Profit & Stop Loss Levels

One of the most powerful features of Neuro Poseidon is its adaptive risk management system.

Stop Loss (SL)

The Stop Loss level is automatically calculated based on current market conditions.

Purpose:

- Protect trading capital
 - Limit risk
 - Remove emotional decision-making
-

Take Profit (TP)

The Take Profit level is automatically calculated to identify logical profit targets.

Purpose:

- Lock in profits
 - Improve trade consistency
 - Simplify trade management
-

Important

Always use proper money management.

Recommended Usage

Scalping

Recommended timeframes:

- M1
- M5
- M15

Suitable for active traders seeking frequent opportunities.

Intraday Trading

Recommended timeframes:

- M15
- M30
- H1

Suitable for day traders.

Swing Trading

Recommended timeframes:

- H4
- D1

Suitable for traders holding positions for multiple days.

Risk Management

For best results:

Risk Per Trade

Recommended:

- 1%–2% of account balance per trade

Avoid Overtrading

Only trade confirmed signals.

Follow TP & SL Levels

Do not remove Stop Loss protection.

Maintain Discipline

Consistency is more important than taking every possible trade.
